

Job Description

Position: PLC Programmer

Location: Midland, TX

Who We Are

As an energy service company, Noralta Technologies provides a combination of patented technology and service that supports oil and gas producers across North America. We aim to fully understand the goals and obstacles our clients face, and continually innovate ways to help them improve their performance. In this way, we envision becoming outstanding partners to our clients, constantly evolving new technologies and services, and sharing in their successes.

Why work here

Surrounded by co-workers who are engaged in the community, our employees take pride in the work that they do and the company that they work for. The Senior PLC Programmer will join an established team of professionals who are respected for dedication and loyalty. With a 28-year successful history, the company has grown up in the energy industry. Noralta strives to create an atmosphere and culture that embraces work/life balance, an understanding of what our employees require to be successful and where hard work and commitment is rewarded with advancement opportunities.

What our work looks like

- Provide programming expertise on new products and technology.
- Provide programming expertise and control system design for small to medium sized oil and gas installations throughout the Permian Basin
- Programming SCADA products and support of these systems (IDEC PLC's, Allen Bradley PLCs, SCADAPack, Totalflow products, Bristol, Siemens PLC's ROC, Kimray and Schneider M221 controllers)
- Programming HMI related products (Panelview, FactoryTalk, Citect, SCADAventure, ClearSCADA)
- Communications (radio, cellular, etc.) and networking assistance
- Based in the Midland office but may require up to 75% travel throughout the Permian Basin for new project work and in response to business needs.
- Provide exceptional customer support to our clients in the Midland office and in the field.

Qualifications

- Minimum of 2 years programming in the field on Oil and Gas sites is a must.
- Journeyman or Apprentice Instrumentation/Electrician Technician qualifications would be an asset.

- Will be involved with hands on installation of control systems and that experience would be an asset.
- Strong customer service skills
- Demonstrated experience working outdoors in all climatic conditions and sometimes in remote locations.
- Capable of working efficiently under pressure in a sometimes physically demanding environment

Personal qualities

- Proud of the work that you do
- Go the extra mile to finish what you start.
- Openly share your ideas
- Clear respect and support for the complimentary trades.
- Ability to see around the corner – taking a safe approach in everything that you do.
- Comprehensive company benefit plan.
- Company-paid technical training and upgrading
- Use of company vehicle when required.

Please Note:

For your safety and the safety of everyone around you, the following will be required.

- Pre-employment Drug and Alcohol testing
- Driver's abstract
- Two professional references

Full benefits are offered following a 3-month probationary period. We thank all applicants for their interest in Noralta Technologies LLC., but only those chosen for an interview will be contacted.

Job Type: Full-time

Noralta would like to thank all candidates for their applications but only those chosen for an interview will be contacted.
