

## Oklahoma Automation Technician Ad

### Job description

As an energy service company, Noralta Technologies provides a combination of patented technology and service that supports energy producers throughout the United States and Western Canada. Noralta strives to create an atmosphere and culture that embraces work/life balance, an understanding of what our employees require to be successful and where hard work and commitment is rewarded with advancement opportunities. Noralta is in enjoying its 29th year in business providing service to the energy industry.

### Why work here

Our Automation Technicians will experience every aspect of the trade from automation construction to SCADA installation and maintenance. Each day offers variety and challenge. Surrounded by co-workers who are engaged in the community, our employees take pride in the work that they do and the company that they work for.

With a 29-year successful history, the company has grown up in the energy industry. Noralta strives to create an atmosphere and culture that embraces work/life balance, an understanding of what our employees require to be successful and where hard work and commitment is rewarded with advancement opportunities.

### What our work looks like

This is a permanent full-time position for the Oklahoma area. We seek Automation Technicians with relevant commercial, industrial and oilfield experience. With a consistent focus on safety, cost control and client satisfaction, the Automation Technician will also have a history of producing quality work with attention to detail that meets or exceeds client needs. Selected candidates can be expected to:

- Provide automation and programming expertise for oil and gas technology throughout the Oklahoma area, delivering support of new products, technologies, and automation projects.
- Program and provide support of industry standard devices and systems (Allen Bradley PLCs, IDEC PLC's, SCADAPack, ABB Totalflow, Schneider PLC, ROC, Kimray, etc.)
- Assist with digital data communications (SignalFire radio, Pepwave and Microhard cellular modems, etc.) and other networking systems.
- Work with Noralta's nTInterface platform and system programmers, supporting new products, technologies, and projects.
- Train clients on the use of nTInterface and train technicians on the installation and maintenance of nTInterface connected devices.

- Travel throughout Oklahoma for new projects and in response to business needs
- Provide exceptional customer support to our clients.

### Qualifications

- GED, programming knowledge and training
- Preference given to those with a technical school diploma in the areas of Automation, Controls, and/or Instrumentation.
- Diverse work experience with electrical and automation systems on Oil and Gas field sites is a must.
- Knowledge of control systems and product testing and that experience would be a must have.
- Demonstrated expertise in management of end-to-end automation projects.
- Strong customer service, multitasking, and problem-solving skills
- Capable of working efficiently under pressure in a sometimes physically demanding environment, demonstrating experience working outdoors in all climatic conditions and sometimes in remote locations

### Personal qualities

- You hold honesty and integrity as core values.
- Act as the Noralta brand ambassador, representing the company and its full service offering to our clients.
- Exceptional communication skills with the ability to identify sales opportunities within the client setting.
- Proud of the work that you do, going the extra mile to finish what you start and openly sharing your ideas.
- Demonstrate clear respect and support for the complimentary trades.
- Ability to see around the corner – taking a safe approach in everything that you do.
- Personally involved in the community in which you reside.

### Noralta provides:

- Fully tooled corporate service vehicle will be provided.
- PPE and safety training

### Please Note:

For your safety and the safety of everyone around you, the following will be required.

- Pre-employment Drug and Alcohol testing
- Background check

- Drivers abstract and a valid Driver's License
- Two professional references

Job Type: Full-time

Salary: From \$40.00 - \$55.00 per hour
